

Installing Docker on Linux

These steps listed below are for Ubuntu Desktop 18 LTS. You can find the full official

Ubuntu: <https://docs.docker.com/install/linux/docker-ce/ubuntu/>

Fedora: <https://docs.docker.com/install/linux/docker-ce/fedora/>

CentOS: <https://docs.docker.com/install/linux/docker-ce/centos/>

Debian: <https://docs.docker.com/install/linux/docker-ce/debian/>

Installing Docker

The Docker docs suggest setting up a Docker repository to install and update from.

This is where you should start:

<https://docs.docker.com/install/linux/docker-ce/ubuntu/#set-up-the-repository>
